

### Metallic Prints

Kodak Professional Endura Metallic paper gives your prints a luscious, glossy liquid look with unbeatable depth and sparkle. What's the difference between a Metallic Print and a Gloss Print? Well, the white point (or base) of the paper has a silvery look, as opposed to the white base of the Gloss paper. When you combine this silver base with photos of metal, vibrant colors, or even rich skin tones, you get images that look almost 3-Dimensional. With the right image, the results are amazing! *Additional sizes available. Please contact the lab for pricing.*

Print Size	Paper Type	1 to 9	10 to 19	20 to 49	50 to 99	100 to 249	250 to 499	500 to 9999
