

Passport Photo Services

Passport and immigration photos can be photographed while you wait! At Digital Pro Lab, we have trained passport specialists who are familiar with a variety of different countries' passport requirements. All Passport and Immigration photos are shot on a white background and printed on glossy paper. The photos are printed in sets (i.e., U.S. Passport requires a set of 2), and additional sets from the same image are usually available at a discount.

The most common passport types are U.S., Canadian and Mexican. While we are familiar with most passport specifications, it is always helpful if you have a copy of your country's detailed passport or immigration photo requirements.

We guarantee that our passport photos will be accepted by the passport agency or we will re-make them at no charge.

Passport Photo Tips:

Because passport photos are shot on a white background, we recommend that you wear a non-white shirt for the best results.

For Infant Passports, a white sheet and car-seat/stroller may be required for use as a background.
