

### Print Scanning

Do you have prints that you need scanned and archived? We offer two different Print Scanning options: **Professional** and **Batch**. Our Professional Scans are the highest quality scans we offer. All of our Professional Scans are adjusted for color, brightness, density and contrast by one of our trained lab technicians, giving you the best quality digital files from your scanned prints. Our Batch Scans are self-service and are available while you wait on our in-store kiosks. Simply put a stack of unmounted prints (3x5 to 8x12) in the batch scanner and burn your scanned images directly to a disc or order prints from the kiosk. We also offer **Lab Assisted Batch Scanning** for customers that would prefer our lab technicians to do the scanning, or that require assistance from a lab technician while scanning.

Some older, framed prints tend to get stuck to the frame's glass. In this instance, it is possible to have your print scanned without taking it out of the frame. Removing an older print that may be stuck to the glass could possibly damage the print. We do not remove prints that are stuck to glass, but we can digitally restore any scratches or tears that may have occurred if you have removed a print from the glass yourself. Restoration fees may apply.

Professional Print Scan	1 Scan	2 to 19	20 to 9999
8x12 & Smaller	<b>\$7.50</b>	\$7.50	\$4.95
11x14 to 16x20	<b>\$19.95</b>	\$19.95	\$19.95
